Instructions

1. Capsule is supplied with a desk fixing C clamp as standard. This can be used on desk thicknesses of 11mm to 30mm. Note: 2x M8 x 25mm grub screws are supplied and can be used to fit the C clamp to sliding desk tops or where space is limited under the desk.

2. Remove the Capsule module and the C clamp from the box.

3. Find a suitable place for the module to be installed and position the back of the module against the back of the desk.

4. Take the C clamp and un-screw the fixing bolt to its maximum position.

5. Place the upper section of the C clamp onto the base at the back of the module and tighten the thumbs screw until the module is secured to the desk surface. (Note: this may require access to the underside of the desk)

6. The 1.5m cable and Wieland connector should be placed into a cable management basket under the desk and connected to the power supply by a qualified or competent person.

7. To reset the thermal reset, remove all plugs from the UK sockets, leaving the On/Off switches 'on'. Press the red reset button on top of the module until the LED lights on the switches are illuminated.

3. Position the module in-line with the back of the desk

4. Un-screw the C clamp fixing bolt

5. Fit and tighten the C clamp to secure the module
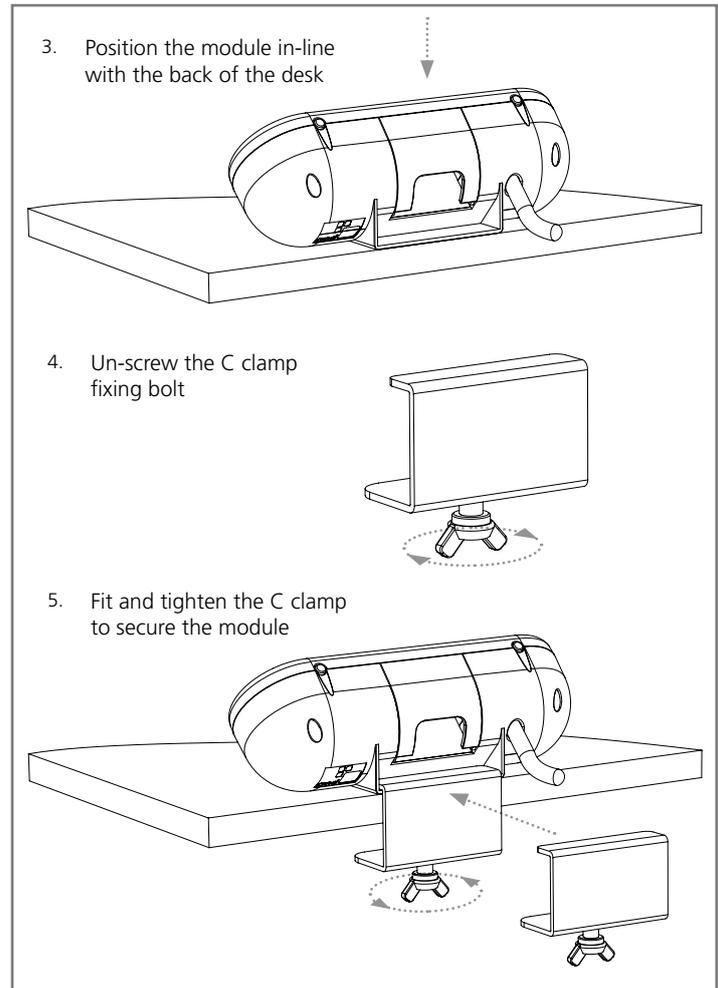

Fitting the Keystone Couplers

(Note: Keystone couplers may vary in size, which may affect the way they fit into the Capsule module)

7a.

Remove the keystone cover and keystone blanks from the module

7b.

Fit the keystone coupler inside the module

7c.

Connect the data cable to the back of the keystone coupler

7d.

Replace the keystone cover

Warning

Do not use this product for any purpose other than which it was designed for.

All electrical cables should be fitted by a qualified or instructed person.

Do not dismantle or remodel the power module.

Cleaning, Storage & Maintenance

Cleaning & Maintenance	Dry cloth, no abrasives or solvents to be used on the module surface.
Handling & Storage	Do not drop or expose to moisture.
