

# RollerMouse Pro

## Combining design and functionality for ergonomic impact

---

Take a proactive approach to your health at work with a centered mouse that allows you to do desk work comfortably and ergonomically. With the RollerMouse Pro, you control everything; cursor navigation, programmable buttons and a large scroll wheel are all centralized right in front of you.

We have built it like this to prevent you from stretching, twisting and straining. It is seamless to customize it to match your personal preferences with the magnetic wrist rests that come in different sizes and materials.

RollerMouse Pro is designed and developed in Scandinavia in collaboration with ergonomic experts. You can see the Nordic characteristics in the minimalistic approach that unites functionality with the aesthetic.

**Contour**

## Two hands are better than one

---

With a centered mouse, your arms are placed in a natural position in front of your body. This removes tension on shoulders, arms, and elbows, giving you a more comfortable and ergonomic working position. It allows for variation, as you can use your right and left hand for cursor navigation while controlling the clickable Rollerbar with a slight touch of the fingertips. Simply put, you have all functions within reach.

## Individual needs, individual solutions

---

Customize your RollerMouse Pro to your personal preferences with the unique magnetic wrist rests, allowing you to easily change between the various models. Choose between vegan leather, fabric, or natural Bamboo in three different sizes.

The vegan leather version has an antibacterial surface and highest alcohol resistance for improved hygiene. It is easy to change click sounds, cursor speed and click resistance, finding the setup that works best for you.

## Plug & Play installation

---

Connect the RollerMouse Pro to your PC or Mac via Bluetooth, the USB receiver or cable depending on your preferred method. Fits both full-width and compact keyboards. Control multiple screens and customize the programmable buttons to your favourite shortcut functions.

## Technical specifications RollerMouse Pro
